CAREER OBJECTIVE

Computer Science and Engineering (Artificial Intelligence) student with a strong foundation in Machine Learning, Natural Language Processing, and Web Development. Passionate about building intelligent and user-centric applications that solve real-world problems. Experienced in developing AI-powered applications and modern web solutions, with a keen interest in creating innovative technologies that enhance productivity and user experience.

EDUCATION

B.Tech – Computer Science And Engineering (Artificial Intelligence)

Jain University

CGPA: 7.6 / 10

2023 – 2027

India

SSLC (10th Grade)

Indian Certificate of Secondary Education (ICSE)

Percentage: 83%

2nd PUC (12th Grade)

Board of Pre-University Education, Karnataka

Percentage: 85%

TECHNICAL SKILLS

Programming Languages

Python, Java, C, C++

Database

MySQL

Tools

VS Code, Git, Jupyter Notebook

AI / ML

Natural Language Processing (NLP) Linear Regression, Logistic Regression, KNN, Naive Bayes, SVM

Web Technologies

HTML, CSS, JavaScript, Flask

PROJECTS

Career Forge

CareerForge AI: Built an AI-powered career guidance platform using NLP and Machine Learning for resume ranking, ATS analysis, skill gap detection, and placement prediction. Implemented resume parsing, job-role matching, and personalized learning roadmap generation to help students improve employability. Developed optional resume comparison and job description matching features and deployed the solution as a Flask-based web application.

Web Developer & Business Owner – KCR VALIDATIONS

KCR VALIDATIONS : Developed and maintained a responsive business website for a cleanroom validation and calibration services company using HTML, CSS, and JavaScript. Designed and implemented modern UI/UX components, service showcase pages, inquiry management, contact integration, and interactive features to improve customer engagement and strengthen the company's digital presence. Optimized the website for responsiveness, accessibility, and seamless user experience across devices.

Task Manager (NLP)

Taskflow AI: Developed an intelligent task management web application that converts natural language input into structured tasks using NLP techniques. Built an interactive and responsive user interface with task creation, organization, and tracking features to improve productivity and workflow management. Implemented modern web technologies and user-centric design to provide a seamless task management experience.

Personal Portfolio Website

Responsive portfolio website developed using HTML and CSS.
